

# VETERINARY METAL DETECTOR / FOREIGN BODY METAL DETECTOR

MODEL: SM-75

## PRODUCT FEATURES

### • Description

This Metal detector is specially designed for detection of covered ferrous and non-ferrous metal parts from animal digestive track

### • Functional Utility

Animal can easily eat ferro-magnetic bodies together with their feed. These parts will enter into the digestive track and could stick in the digestive track walls, causing pain and infections. The clinical picture is very similar to bronchitis. For getting a clear diagnosis of the foreign bodies specially designed Foreign body detector for veterinary use is required.

### • Product Uniqueness, Concept and Design

This is a high precision special instrument, for detecting covered magnetic and non-magnetic metal parts. Magnetic parts can be detected already from a larger distance, depending on their size, whereas non-magnetic metal parts (like copper, aluminum or brass) can be detected from a short distance only. This also ergonomically design for easy use in the field by veterinarian.
